Version 1.0

# Table of Contents

1. Preface.....	3
2. Reservation System .....	3
3. Front-end .....	3
4. Backend .....	3
5. Website .....	4
6. Additional .....	4
7. Others .....	4
8. Copyright .....	4

## 1. Preface

In this document will be all the information about what part of the website I have tested and if it was successful or failed. These tests are mostly from my previous document, Test Plan, most of the functionalities I wanted to test are written here with some additional ones I did not mention in my Test Plan.

## 2. Reservation System

### 2.1 User

1	User can successfully make a reservation	Y
2	User can successfully select the room type of his/her choice	Y
3	User can successfully fill in his personal information in a form	Y
4	User can successfully view their invoice after reservation	Y
5	User can successfully book a room	Y
6	User can successfully view the room details	Y

### 2.2 Administrator

7	Administrator can successfully view reservations	Y
8	Administrator can successfully print the reservations	Y
9	Administrator can successfully create new rooms	Y
10	Administrator can successfully read existing rooms	Y
11	Administrator can successfully update existing rooms	Y
12	Administrator can successfully delete existing rooms	Y
13	Administrator can successfully read customer details	Y
14	Administrator can successfully login to the admin panel	Y
15	Administrator can successfully logout from the admin panel	Y
16	Administrator can successfully create new categories	Y
17	Administrator can successfully read the contact page	Y
18	Administrator can successfully read the alerts page	Y
19	Administrator can successfully read the opening hours page	Y
20	Administrator can successfully read the location page	Y

## 3. Front-end

### 3.1 User

21	User can successfully navigate through the website	Y
22	User can successfully view information about the room	Y
23	User can successfully click on buttons / links	Y
24	User can successfully fill information in forms	Y
25	User can successfully view all rooms by category	Y

### 3.2 Administrator

26	Administrator can successfully navigate the admin panel	Y
27	Administrator can successfully view all the customer details	Y
28	Administrator can successfully view all the reservation details	Y
29	Administrator can successfully view all the room details	Y
30	Administrator can successfully view all the pages	Y
31	Administrator can successfully view his profile	Y
32	Administrator can successfully click on items	Y

## 4. Backend

### 4.1 User

33	User can successfully download their invoice	Y
34	User can successfully fill in and submit their form	Y

### 4.2 Administrator

35	Administrator can successfully login to the admin panel	Y
36	Administrator can successfully delete existing rooms	Y
37	Administrator can successfully update existing rooms	Y
38	Administrator can successfully print the invoices	Y
39	Administrator can successfully logout from the admin panel	Y

## 5. Website

### 5.1 Database

40	Website can successfully connect to database	Y
41	Website can successfully load information from database	Y
42	Website can successfully insert data into database	Y
43	Website can successfully give error messages	Y

## 6. Additional

### 6.1 Security

44	Users cannot access admin panel from URL	Y
45	Users cannot insert SQL queries from the customer form	Y
46	Users have to follow specific format in the form	Y

### 6.2 Code

47	Code is clean	Y
48	Code uses PDO	Y
49	Code uses functions in Classes	Y
50	Code has comments	Y
51	Code uses DRY method (mostly)	Y

### 6.3 Database

52	Database is protected from SQL injections	Y
53	Database uses foreign keys	Y

### 6.4 Duplicate

54	There is a duplicate checker for rooms	Y
55	There is a duplicate checker for customers	Y
56	There is a duplicate checker for reservations	Y

## 7. Others

All these functionalities and additional have been tested on June 18<sup>th</sup> of 2020. All these tests have acceptable outputs and are working according to my planning.
